ATS COMPATIBILITY SCORE

Compatibility Assessment: **GOOD FIT**

Strong match across technical stack with minor niche gaps.

1. Technical Competency & Skill Gap Analysis

|                                                                                                      |                                                                               |
|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| <div>MATCHED SKILLS (6 Verified):</div> <div>python, pytorch, tensorflow, docker, aws, fastapi</div> | <div>CRITICAL SKILL GAPS (3 Missing):</div> <div>lora, pinecone, milvus</div> |
|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|

2. Strategic Optimization Plan & Actionable Recommendations

**[HIGH]** Add Vector DB Experience: Highlight any work with vector embeddings and Milvus/Pinecone.

This report is dynamically synthesized by **Altire AI Multi-Modal NLP Intelligence Engine v2.0**. Analysis includes Sentence-BERT dense embeddings, Cross-Encoder joint attention, 500+ technical ontology matching, and XGBoost regressor scoring calibrated against real-world ATS benchmarks.
